

Complete Gynecology OPD Workflow

End-to-end workflow and field specification for the Digital OPD Desk

Purpose

This document extends the existing Digital OPD Desk into a Gynecology-specific workflow. The common OPD foundation remains the same—registration, appointments, token/queue, vitals, clinical notes, prescriptions, reports, patient timeline and patient portal. Gynecology-specific information is collected during consultation according to the patient's complaint and clinical need.

1. End-to-End Patient Flow

2. Patient Registration

Patient Identification

Field	Requirement / Notes
Patient Name	Required
Mobile Number	Required
UHID — auto-generated for new patient	Collect during this stage
Gender	Collect during this stage
Date of Birth	Collect during this stage
Age	Collect during this stage
Blood Group	Collect during this stage
Marital Status	Collect during this stage
Government ID / Aadhaar	Collect during this stage

Address & Emergency Contact

Field	Requirement / Notes
House / Street / Area	Collect during this stage
City / District / State / PIN Code	Collect during this stage
Emergency Contact Name	Collect during this stage
Emergency Contact Phone	Collect during this stage
Relationship	Collect during this stage

System Actions

Field	Requirement / Notes
Generate UHID	Collect during this stage
Generate patient portal PIN	Collect during this stage
Create / update patient profile	Collect during this stage

3. Appointment Booking

Appointment Details

Field	Requirement / Notes
Department: Gynecology	Collect during this stage
Doctor	Collect during this stage
Appointment Date	Collect during this stage
Available Time Slot	Collect during this stage
Appointment Type: New Consultation / Follow-up / Procedure / Emergency / Scan / Surgery	Collect during this stage
Chief Complaint / Reason for Visit	Collect during this stage
Brief Description	Collect during this stage

Referral

Field	Requirement / Notes
Referral Status	Collect during this stage
Referral Doctor	Collect during this stage
Referral Hospital / Clinic	Collect during this stage
Referral document, if applicable	Conditional / as applicable

4. Check-in & Queue

Check-in Information

Field	Requirement / Notes
Appointment status: Arrived	Collect during this stage
Check-in time	Collect during this stage
Token Number	Collect during this stage
Assigned Doctor	Collect during this stage
Queue Position	Collect during this stage
Estimated Waiting Time	Collect during this stage

Queue Flow

Field	Requirement / Notes
BOOKED → ARRIVED → WAITING → CALLED → IN CONSULTATION → COMPLETED	Collect during this stage
Optional states: SKIPPED / CANCELLED / NO SHOW	Conditional / as applicable

5. Nurse / Pre-Consultation

Vitals

Field	Requirement / Notes
Blood Pressure	Collect during this stage
Pulse Rate	Collect during this stage
Temperature	Collect during this stage
SpO ₂	Collect during this stage
Weight	Collect during this stage
Height	Collect during this stage
BMI — automatic calculation	Collect during this stage

Basic Screening

Field	Requirement / Notes
Current pregnancy status	Collect during this stage
Known allergies	Collect during this stage
Current medications	Collect during this stage
Existing medical conditions	Collect during this stage
Urgent / emergency symptoms	Collect during this stage

6. Doctor Patient Summary

Information visible before consultation

Field	Requirement / Notes
Name, age, UHID	Collect during this stage
Blood group	Collect during this stage
Allergies	Collect during this stage
Medical history	Collect during this stage
Current medications	Collect during this stage
Previous diagnoses	Collect during this stage
Previous prescriptions	Collect during this stage
Previous investigations	Collect during this stage
Previous gynecology visits	Collect during this stage
Chronological patient timeline	Collect during this stage

7. Chief Complaint & Presenting Symptoms

Core fields

Field	Requirement / Notes
Main complaint	Required
Duration	Required
Severity	Collect during this stage
Additional complaints	Collect during this stage
Brief description	Collect during this stage

Examples

Field	Requirement / Notes
Irregular periods	Collect during this stage
Heavy menstrual bleeding	Collect during this stage
Period pain	Collect during this stage
Pelvic pain	Collect during this stage
Vaginal discharge	Collect during this stage
Pregnancy-related consultation	Collect during this stage
Infertility	Collect during this stage
PCOS-related concern	Collect during this stage
Menopause symptoms	Collect during this stage
Contraception / family planning	Collect during this stage
Routine gynecological check-up	Collect during this stage
Other	Collect during this stage

8. Menstrual History — Conditional

Fields

Field	Requirement / Notes
Age at menarche	Collect during this stage
LMP	Collect during this stage
Cycle regularity: Regular / Irregular	Collect during this stage
Cycle length	Collect during this stage
Bleeding duration	Collect during this stage
Flow: Light / Moderate / Heavy	Collect during this stage
Pads per day	Collect during this stage
Clots	Collect during this stage
Menstrual pain	Collect during this stage
Pain severity	Collect during this stage
Intermenstrual bleeding	Collect during this stage
Post-coital bleeding	Collect during this stage
Menopause status	Collect during this stage
Age at menopause, if applicable	Conditional / as applicable

9. Obstetric History

Pregnancy Summary

Field	Requirement / Notes
Gravida (G)	Collect during this stage
Para (P)	Collect during this stage
Abortions (A)	Collect during this stage
Living (L)	Collect during this stage
Ectopic pregnancy, if applicable	Conditional / as applicable

Previous Pregnancy — repeatable

Field	Requirement / Notes
Pregnancy number	Collect during this stage
Year	Collect during this stage
Gestational age	Collect during this stage
Outcome	Collect during this stage
Mode of delivery	Collect during this stage
Baby sex	Collect during this stage
Birth weight	Collect during this stage
Pregnancy complications	Collect during this stage
Maternal complications	Collect during this stage
Neonatal complications	Collect during this stage

10. Current Pregnancy — Conditional

Pregnancy Details

Field	Requirement / Notes
Pregnancy status: Not pregnant / Suspected / Confirmed	Collect during this stage
LMP	Collect during this stage
EDD	Collect during this stage
Gestational age	Collect during this stage
Current pregnancy symptoms	Collect during this stage
Vaginal bleeding	Collect during this stage
Abdominal / pelvic pain	Collect during this stage
Other pregnancy concerns	Collect during this stage
Previous pregnancy complications	Collect during this stage
Current pregnancy complications	Collect during this stage

11. Gynecological History

Previous Conditions

Field	Requirement / Notes
PCOS	Collect during this stage
Fibroids	Collect during this stage
Endometriosis	Collect during this stage
Ovarian cyst	Collect during this stage
Infertility	Collect during this stage
PID	Collect during this stage
STI history	Collect during this stage
Cervical conditions	Collect during this stage
Previous abnormal screening	Collect during this stage
Other	Collect during this stage

Previous Procedures / Surgeries

Field	Requirement / Notes
C-section	Collect during this stage
D&C;	Collect during this stage
Hysteroscopy	Collect during this stage
Laparoscopy	Collect during this stage
Myomectomy	Collect during this stage
Hysterectomy	Collect during this stage
Other	Collect during this stage

12. Sexual & Contraceptive History — When Clinically Relevant

Sexual Health

Field	Requirement / Notes
Sexually active	Collect during this stage
Pain during intercourse	Collect during this stage
STI history	Collect during this stage
Other sexual health concerns	Collect during this stage

Contraception

Field	Requirement / Notes
Current contraceptive method	Collect during this stage
Previous contraceptive method	Collect during this stage
Duration	Collect during this stage
Reason for discontinuation	Collect during this stage
Contraception counseling required?	Collect during this stage
Planning pregnancy?	Collect during this stage

13. Medical History & Allergies

Medical History

Field	Requirement / Notes
Diabetes	Collect during this stage
Hypertension	Collect during this stage
Thyroid disease	Collect during this stage
Anemia	Collect during this stage
Heart disease	Collect during this stage
Kidney disease	Collect during this stage
Liver disease	Collect during this stage
Other	Collect during this stage
For each: diagnosis date and active/resolved status	Collect during this stage

Allergies

Field	Requirement / Notes
Allergy name	Collect during this stage
Severity: Low / Medium / High / Critical	Collect during this stage
Reaction	Collect during this stage

14. Examination

General Examination

Field	Requirement / Notes
General condition	Collect during this stage
Pallor	Collect during this stage
Icterus	Collect during this stage

Field	Requirement / Notes
Edema	Collect during this stage
BMI	Collect during this stage
Other findings	Collect during this stage

Abdominal Examination

Field	Requirement / Notes
Tenderness	Collect during this stage
Abdominal mass	Collect during this stage
Distension	Collect during this stage
Other findings	Collect during this stage

Pelvic Examination — only if performed

Field	Requirement / Notes
Examination performed	Collect during this stage
Consent	Collect during this stage
Chaperone	Collect during this stage
External examination	Collect during this stage
Vaginal findings	Collect during this stage
Cervical findings	Collect during this stage
Discharge	Collect during this stage
Bleeding	Collect during this stage
Tenderness	Collect during this stage
Mass	Collect during this stage
Other findings	Collect during this stage

15. Investigations & Reports

Existing Reports

Field	Requirement / Notes
Lab reports	Collect during this stage
Ultrasound / imaging	Collect during this stage
Previous prescriptions	Collect during this stage
Previous consultation notes	Collect during this stage
Other documents	Collect during this stage

Investigations Ordered

Field	Requirement / Notes
Investigation name	Collect during this stage
Reason / indication	Collect during this stage
Priority	Collect during this stage

Field	Requirement / Notes
Instructions	Collect during this stage

16. SOAP Clinical Documentation

S — Subjective

Field	Requirement / Notes
Chief complaint	Collect during this stage
Menstrual history	Collect during this stage
Obstetric history	Collect during this stage
Gynecological history	Collect during this stage
Relevant medical history	Collect during this stage
Symptoms and patient concerns	Collect during this stage

O — Objective

Field	Requirement / Notes
Vitals	Collect during this stage
General examination	Collect during this stage
Abdominal examination	Collect during this stage
Pelvic examination, if performed	Collect during this stage
Investigation findings	Collect during this stage

A — Assessment

Field	Requirement / Notes
Primary diagnosis	Collect during this stage
Secondary diagnosis	Collect during this stage
Differential diagnosis — optional	Conditional / as applicable

P — Plan

Field	Requirement / Notes
Medication	Collect during this stage
Treatment	Collect during this stage
Investigation	Collect during this stage
Procedure	Collect during this stage
Advice	Collect during this stage
Follow-up	Collect during this stage

17. Diagnosis

Assessment

Field	Requirement / Notes
Primary diagnosis	Required

Field	Requirement / Notes
Diagnosis code — if required	Collect during this stage
New / Existing	Collect during this stage
Secondary diagnosis	Collect during this stage
Clinical assessment notes	Collect during this stage

18. Prescription

Medication Fields

Field	Requirement / Notes
Medicine name	Collect during this stage
Dosage	Collect during this stage
Frequency	Collect during this stage
Route — if supported	Collect during this stage
Duration	Collect during this stage
Special instructions	Collect during this stage
Multiple medicines per prescription	Collect during this stage
Prescription status: Active / Cancelled	Collect during this stage

19. Treatment Plan & Procedures

Treatment

Field	Requirement / Notes
Treatment name	Collect during this stage
Description	Collect during this stage
Status: Planned / In Progress / Completed / Cancelled	Collect during this stage
Procedure, if applicable	Conditional / as applicable
Procedure date	Collect during this stage
Additional instructions	Collect during this stage

20. Patient Advice

Advice

Field	Requirement / Notes
Medication instructions	Collect during this stage
Lifestyle advice	Collect during this stage
Diet advice	Collect during this stage
Warning signs	Collect during this stage
Procedure instructions	Collect during this stage
Pregnancy-related advice, if applicable	Conditional / as applicable
Other instructions	Collect during this stage

21. Follow-up

Follow-up

Field	Requirement / Notes
Follow-up required?	Collect during this stage
Follow-up date	Collect during this stage
Follow-up reason	Collect during this stage
Investigations to bring	Collect during this stage
Review after treatment / procedure	Collect during this stage
Referral required?	Collect during this stage
Referral department / doctor	Collect during this stage

22. Consultation Completion

System Actions

Field	Requirement / Notes
Doctor clicks Complete Consultation	Collect during this stage
Record consultation time	Collect during this stage
Save diagnosis	Collect during this stage
Save clinical notes	Collect during this stage
Save prescription	Collect during this stage
Save investigations	Collect during this stage
Save treatment plan	Collect during this stage
Save follow-up	Collect during this stage
Queue status → COMPLETED	Collect during this stage

23. Patient Portal & Timeline

Patient Portal

Field	Requirement / Notes
Appointment information	Collect during this stage
Queue position	Collect during this stage
Prescriptions	Collect during this stage
Reports	Collect during this stage
Vitals	Collect during this stage
Patient profile	Collect during this stage
Previous appointments	Collect during this stage

Patient Timeline

Field	Requirement / Notes
Registration	Collect during this stage
Appointments	Collect during this stage

Field	Requirement / Notes
Queue events	Collect during this stage
Vitals	Collect during this stage
Clinical notes	Collect during this stage
Menstrual / obstetric / gynecological history	Collect during this stage
Investigations and reports	Collect during this stage
Diagnosis	Collect during this stage
Prescriptions	Collect during this stage
Treatment plans	Collect during this stage
Follow-up	Collect during this stage

24. Dynamic Field Logic

The Gynecology OPD should not display every clinical field to every patient. The consultation screen should use a dynamic structure: common OPD fields remain available, while specialty fields appear when relevant to the chief complaint, pregnancy status, or examination performed.

Trigger	Show / activate
Every patient	Patient summary, chief complaint, vitals, assessment, prescription/treatment, follow-up
Menstrual-related complaint	Menstrual history
Pregnancy suspected/confirmed	Current pregnancy section + relevant obstetric information
Infertility complaint	Infertility-focused history + relevant reproductive history
Vaginal discharge / pelvic symptoms	Relevant symptom history + examination/investigation fields
Pelvic examination performed	Pelvic examination documentation
Existing patient	Previous timeline, diagnoses, prescriptions, reports and history
Referral	Referral details and referral documents

25. Product Design Principle

Generic OPD Core + Specialty Clinical Template. Keep registration, appointment, queue, vitals, prescription, reports, patient timeline and portal as shared OPD capabilities. Add Gynecology-specific history and examination templates on top. This keeps the product scalable for future specialties without creating a separate OPD system for each department.

Source basis: the existing Digital OPD Desk Product Data Document (Version 1.0, last updated 2026-09-03). The gynecology-specific fields in this document are an extension proposed for product design; they are not claimed to already exist in the current generic OPD document.
